UNCC Student Centers – Charlotte, NC

- Facilitated a positive Student Union and Cone Center patron experience by assisting in everyday building operations
- Troubleshoot technical problems during organized events
- Set up event spaces for upcoming student/organization gatherings and events
- Recorded daily operations and occurrences in end-of-shift logs

Position Title: Crewmember

August 2021 – November 2021

Arby's – Raleigh, NC

- Worked as part of a high-pressure team to fulfill customer orders
- Maintained and cleaned industrial equipment daily
- Responsible for multiple workstations at any given time and relied on to operate each to a competent and constant standard

COURSE PROJECTS

EDA into NC Nursing Homes:

Full write-up documentation in Github pages portfolio

- Queried CMS API dataset to analyze key variables into the overall ratings of NC nursing home providers
- Visualized target and predictor variable relations with Matplotlib and Seaborn using multiple plot types including scatter, displot, regplot, and box-and-whisker
- Utilized scikit-learn, pandas and NumPy modules to construct a linear regression model with significant values linking overall rating to at least 3 variables: number of fines incurred, health and safety inspection rating, and nurse turnover

SKILLS & CERTIFICATIONS

Software: Basic Python and SQL, Pandas statistical analysis, ML regression models

Language: Fluent in English (Native)

Programs: Proficient in Excel, Word, and other Microsoft Office/Google Suite applications
